

If I was an inventor, I would make a kid car. A car just for kids. This could be helpful because say that your parents forgot to pick you up from school and you don't have a phone. You need a car but the

car in this picture without a roof that is already invented, I mean this car!

So you could say I am upgrading it. This is a car that you could do a lot of things, but the main reason is that this car would be a convertible. You could help many people. You can give people food or give them a ride. This car will be made to help people and that is what I want to do. Help people and help the world.
